Above: The LF6 Black & Pewter

The iconic design of the LF range continues throughout the LF6 models.

Producing 6Kw from its large firebox, this model also benefits from the direct air feed system.

Optional plinths are available as well as double-sided and inset versions, and all models are available in the huge range of LogFire colours.

Fully CE approved and certified with a maximum recorded hearth temperature of 46°C the LF6cT smoke exempt model is also available, making the installation opportunities of this model endless.

**Iconic Warmth .....**

**..... Modern Design**
