About Us

LogFire Stoves & Flues Ltd are a specialist UK manufacturer and distributor of high quality chimney and flue products for the domestic, commercial and industrial markets.

WECFlex flue liners are suitable for wood, multi-fuel, gas and oil burning applications. The Flue and chimney range offered by LogFire include Flexible Flue Liners, Twin Wall Insulated Flue Pipes, Vitreous Enamelled Stove Pipes, Wood burning & multi-fuel stove Installation Accessories & chimney cowls.

WECFlex flexible flue liner consists of two layers of 316 or 904 grade austenitic stainless steel strip which provides great strength and flexibility. The flue liners have a smooth inner skin to discourage the build-up of soot and other potentially corrosive residues by encouraging the rapid flow of flue gases, and a corrugated external layer provides protection from the stresses of installation. Liners are available from stock, and come in four diameters ranging from of 125mm to 200mm. Cut coil lengths are available from 6 - 12M, & larger rolls of 20M - 100M lengths are also available.

WECFlex stocks a variety of installation and connection accessories including High Temperature Fire Cements, Rope, Chimney Insulation, Fire Board, Smoke Pellets, Register Plates, Carbon Monoxide Alarms and Flashings.

Whether your requirement is for a new system or part of a renovation project, our engineers will advise on a solution that is both cost effective and tailored to meet your specific needs.

WECFlex liners come with a standard 10 year manufacturer's warranty, which compliments the lifetime guarantee which covers the entire LogFire LF Range of wood burning and multi-fuel stoves.
